

Preformed Tension Clamp Datasheet

PG-FW01S

Features

- ◆ Strong clamping force to prevent cable movement
- ◆ Corrosion resistance for durability in harsh environments
- ◆ Easy installation without special tools or equipment
- ◆ Versatility for various cable and power line applications

Performances

The performances of this product material are fully compliant with the following international standards:

- IEC 60888 Zinc-coated steel wires for stranded conductors

Specification

Material	Galvanized steel
Grip Length	410 mm
Rod Diameter	2.2 mm
Number of Rods	5
Compatible Cable Type	ADSS
Compatible Cable Diameter	9.4-10.4 mm
Color Code	Red

Installation

To use a preformed tension clamp, the cable is intertwined with the two legs of the clamp, and then the twisted ring is used to attach it to hooks or brackets.

Other Model

Preformed tension clamp is not a standard component. For designing a customized preformed tension clamp for your application, we require information regarding the compatible cable diameter and the tensile strength of the cable.
